## USA BC Fitting Dogs

Added to database 14.10.2014

Owner: Heather Henisey (USA)

Fitting began aged 4 years. Vet confirmed as Epilepsy. Medication: None. The fits are very mild and she is at this time being treated holistically  
on a hot day when the dogs were out running and we thought that might have triggered it  
for second we took her to a vet to have it confirmed where several tests were done. She continues  
average one to two times a month. Originally fed on Diamond High Energy at the onset but it  
was decided that we place her in a less physical home so that her protein and fat content could be lowered.  
She is now at home on an adult formula by Diamond. The fits are more frequent now but also more mild.

Added to database 12.01.2015

Owner: Nancy Gyes of San Jose CA 95127

Fitting began aged 7 years, Vet confirmed as Epilepsy. Medication: KBr, PB  
Agility when first fit happened. Seizures were controlled by stopping agility along with  
on high quality grain free kibble. Neutered. Panic died of a lung tumor of unknown cancerous  
origin on 13, 2014
